

Pipeline outcome status (preliminary release)

red = not analysable, blue = analysed

H1 HOT-1 meta-d'/d'

Stage-1 stream crashed; numpy.trapz API removed

H1 HOT-2 probe AUC

n = 0 (insufficient eligible items)

H1 GWT attention entropy

Empty; no successful capture pairs

H1 RPT reentrance

Unavailable; no successful pairs

H2 Self-model RSA

Not run (PENDING)

H3 SAE causal clamp / inject

Not run (PENDING; SAE training skipped)

H4 Memory-ablation retention

Both with-/without-memory accuracy = 0.0

H5 Cumulative-surprise alpha

No per-step trajectory written

--- Phi_R approximation

Returned numerical values for 10/10 runs
